One of the protection measures advised by the World Health Organisation (WHO), against the current outbreak of the 2019 novel coronavirus (2019-nCoV/Covid-19), washing hands regularly.

We should wash our hands with soap and running water. If soap and water are not readily available, use an alcohol-based hand sanitizer, with at least 60% alcohol content.

I.D.C. IS 258 Disinfectant Sanitizer Liquid is a broad spectrum Food Grade hand sanitizer. It is effective against virus, bacteria, fungi and yeasts.
